Briefing

Bied een creatieve oplossing voor de bovenstaande probleemstelling door individueel een content management system te customizen en uit te breiden, gemaakt met de topics die tijdens de colleges aan bod kwamen, en bestaat uit een:

LETS staat voor "Local Exchange and Trading System". Vrij vertalen we dit wel eens als "lokaal uitwisselings systeem". Het ruilsysteem in deze vorm ontstond in een plaats in Canada waar op korte termijn de werkverschaffing en dus rechtstreeks de inkomsten van mensen wegdroeg. Uit noodzaak gingen zij weer ruilen, maar dan wel op een eigentijdse manier. Nadien heeft het idee zich snel verspreid over de hele wereld.

Analyse

LETS = Ruil systeem

Doel:

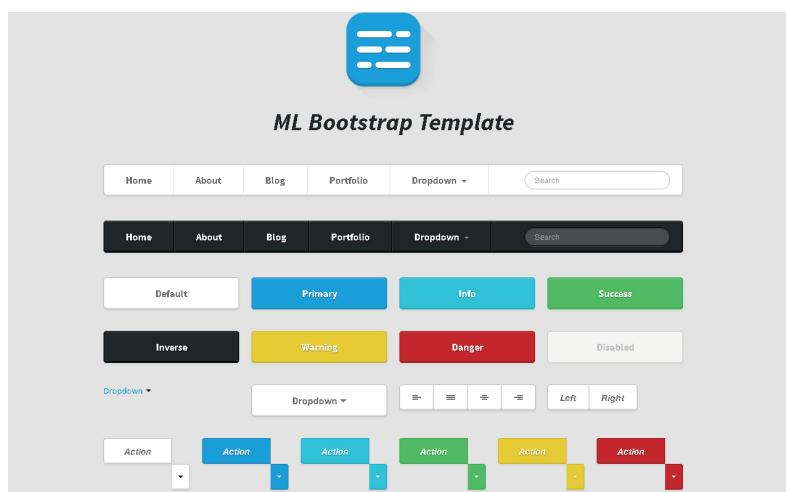

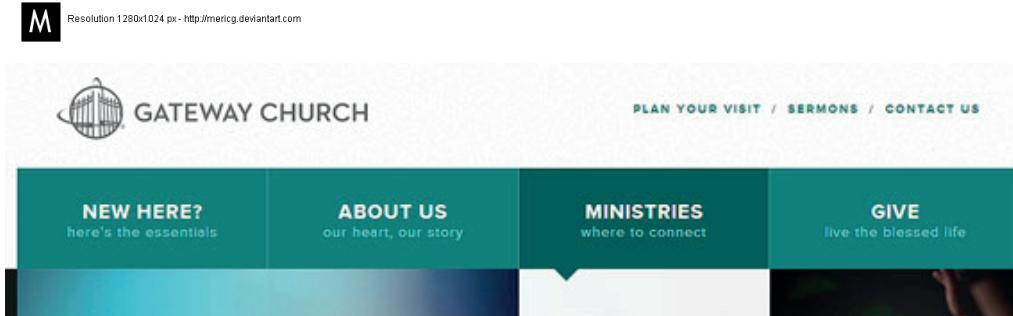

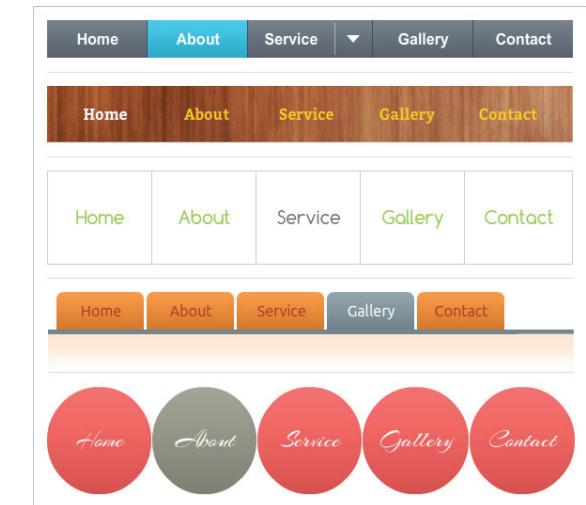

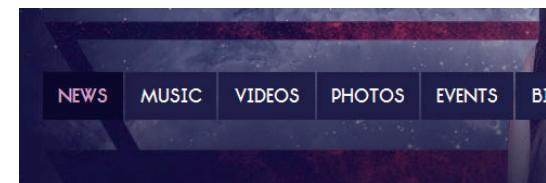

Ontwikkel een CMS systeem dat LETS stimuleert.

Profilering:

Voor iedereen boven 18 jaar, moet overweg kunnen met het internet.

Bouquet

PHOTOGRAPHIC SERIES, 2013, EDITION 1/5

A crossbreed between function and ornamentation. These bouquets of flowers with artifacts from different object realms concealing or protecting the delicate blooms represent an altered space where a gallery of personalities have left traces alluding to a narrative, a series of events or a deliberate misunderstanding. The tableaus point towards a warped reality where things out of place are perfectly in place.
